## Projects

### Validation library

Utility for data validation, published to npm. Makes use of Promises, array methods and recursion in order to achieve a highly abstract API. Features object and array validation, custom validators and optional fields. See [the documentation](#).

### Blog platform

A website for anyone to sign up and write. Features tags, draft posts, comments and replies. [The client](#) is built with Next.js using server side rendering and it's connected to a [Node.js API](#). Styling is done using CSS modules.

## Articles

### Async JavaScript

In this three part tutorial series I explain everything one needs to know in order to start using AJAX. Read the [first article here](#).

### CSS Layouts

In this article I present three interesting layouts and explain the steps to achieve them using CSS. You can [read it here](#).

## Technologies

### Languages

- HTML
- CSS
- JavaScript

### Front-end frameworks

- React
- React Router
- Next.js

### Back-end tech

- Node.js
- Express
- MongoDB
- Mongoose

### Tools

- Linux terminal
- Git
- Npm

## About

I'm an aspiring web developer passionate about creating great software - anything from intuitive user interfaces and well-organized APIs to neat utilities that get stuff done. Most of the time I work with React but I'm also comfortable with vanilla JavaScript and have experience in writing Node.js apps.
